

JAYDEEP PATIL

480-273-9189 | patiljaydeep688@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Scottsdale, AZ

Full-stack software engineer with 2+ years of production experience building scalable web applications, REST APIs, and AI-powered systems. M.S. Computer Science, Arizona State University (GPA 3.80). Proven track record shipping end-to-end features across React/TypeScript frontends and Node.js/Java backends — with hands-on experience in LLM integration, cloud infrastructure on AWS, and CI/CD pipelines. Passionate about building products that solve real user problems at scale.

EDUCATION

M.S. Computer Science | Arizona State University | GPA: 3.80 / 4.00 **Aug 2023 – May 2025**

▸ 1st Place, 24-Hour Hackathon (2×) | Arizona State University

B.E. Electronics & Computer Science | Mumbai University | GPA: 9.28 / 10.00 **Aug 2019 – May 2023**

TECHNICAL SKILLS

Languages: Python | TypeScript | JavaScript (ES6+) | SQL | Bash | C++ | Java

Frontend: React | Next.js | Tailwind CSS | Zustand | Redux Toolkit | Chart.js | CSS | Angular

Backend & APIs: Node.js | Express.js | FastAPI | Flask | REST APIs | OAuth 2.0 | JWT | GraphQL

Databases: PostgreSQL | MySQL | MongoDB | Redis | Query Optimization | Schema Design

DevOps & Cloud: AWS (EC2, S3) | Docker | Kubernetes | Github Actions | CI/CD | Git

AI & ML: PyTorch | LLM Integration | Generative AI | Prompt Engineering | Claude Code | GitHub Copilot | Scikit-learn | Pandas

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer | Skyfarer Academy | San Diego, CA **Apr 2025 – Present**

- **Owned 6+ production features end-to-end** — engineered REST APIs, OAuth 2.0 integrations, and async services on AWS; optimized queries and reduced **response times ~20% under concurrent load**.
- **Built 15+ strictly-typed React/TypeScript components** — booking, payment, and logistics UIs — building a reusable component SDK adopted across all team workflows; mentored junior engineers on TypeScript best practices.
- Increased booking conversion rate (featured in company newsletter) by shipping Apple ID login, response rate visibility, and personalized checkout fields for **30,000+ monthly visitors**.
- Optimized Core Web Vitals and structured data for flight training keywords, improving Google organic **ranking from position 40+ to top 10; drove 50% increase in organic page views**.
- Leveraged Claude Code and GitHub Copilot with advanced prompting to accelerate delivery — enforcing TypeScript/Git standards, leading structured code reviews, and maintaining Docker CI/CD pipelines for consistent, reliable deployment.

Full Stack Developer | Rajiv Gandhi E- learning Academy | Mumbai, India **Aug 2022 – Apr 2023**

- Designed and **launched a React SPA serving 500+ concurrent users** — real-time seat availability, dynamic registration flows, and role-gated dashboards; delivered 2 weeks ahead of deadline with zero downtime on event day.
- **Optimized MySQL queries cutting response time ~25%** via execution plan profiling and schema indexing; built backend services with **Java Spring Boot** and owned end-to-end CI/CD across a 5-person team.
- **Engineered 8+ Java Spring Boot REST API modules** (enrollment, progress tracking, content delivery) with **zero downtime; load-tested to handle 500+ concurrent users** with real-time data sync.

PROJECTS

LLM Inference Pipeline — GPU-Accelerated Serving | Python • PyTorch • CUDA • Flask • REST APIs **Jan – Apr 2025**

- **Built a production-grade GPU-accelerated AI serving pipeline** on PyTorch — implementing batching, mixed-precision inference, and memory-efficient tensor ops to **reduce LLM inference latency ~25%** at scale.
- Engineered a Flask REST API with prompt engineering hooks, observability instrumentation, and structured error contracts — enabling reliable, predictable LLM consumption for downstream AI-native application workflows.

ShopFlow — Full Stack E-Commerce Platform | React • TypeScript • Node.js • PostgreSQL • AWS • JWT **Aug – Nov 2024**

- Architected a scalable full-stack storefront with React/TypeScript frontend and Node.js REST APIs — Stripe checkout, Zustand cart state, and atomic component library reused across **500+ concurrent users** with Cypress E2E coverage.
- Designed PostgreSQL schema with optimized indexed joins and connection pooling — **JWT auth, role-based access control**, secure session management, and order management dashboard **deployed and monitored on AWS**.

CERTIFICATIONS & ACTIVITIES

- **Student Ambassador | Adobe** — Led **hands-on workshops for 100+ students** on Adobe Creative Cloud tools, focusing on real-world design workflows and productivity; increased tool adoption and student engagement across campus
- **Web Development Internship | Blended Learning** — Built and shipped **3+ production web features** using React and Node.js, including authenticated dashboards and responsive course flows, improving onboarding experience and usability.
- **Frontend Developer (React), Problem Solving (Intermediate) & Software Engineer | HackerRank**
